COMMUNICATION WITH THE RIVER - We greatly fear that the Fraser has succumbed to the biting cold of the past few days and is frezen to its mouth; and as the New Westminster papers pronounce the Brighton road impassable, the denizens of that town are completely shut off from communication with the outer world. The government despatches may consequently miss the mailboat, which starts for California to-morrow. This situation is greatly to be deplored; but it is the natural result of the continuance of the public offices at a point where nature interposes insuperable obstacles to the successful transaction of business. It is gratifying to know, however, that the first step towards removing the capital to Victoria has been taken and that before another month has rolled around the whole establishment will be located at Victoria-the proper place for it, if conomy and efficiency be the objects sought.

" I AM NOT MAD !'-On Sunday a respects able-looking man, who gave the name of George Richards, presented himself at the door of the Police Barracks and stated that he was a resident of New Westminster and had gone mad there; he begged to be taken in and cared for. His prayer was heeded and he was locked up for the night. Yesterday Mr Pemberton questioned the man, when it was discovered that, notwithstanding he does hail from New Westminster, his mental organization is unimpared. When called on to plead, he said "not mad, but drunk, your Lordship," and was dismissed upon payment of a fine of 53.

' New York papers chronicle a very natural mistake made a few days ago in a railroad car. A poor woman had her pocket picked of a wallet containing all the money she had whereupon the gentlemen passengers club bed together and made up her loss to her. Then three of the igentlemen agreed among themselves to take a saunter among the passengers, to see how near they could come to each other, by physiological principles, in pointing out the thief. On comparing notes, it appeared that they had all, unknown to each other, selected the same individual. It was afterward ascertained that the person thus picked out was a New York Alderman

LOOK TO YOUR FASTENINGS .- Two Indians were sent to prison for several months yesterday for robbing the store of P. Manetta on Johnson street, of a quantity of spirits in bottles. The thieves removed the balf shutter from the show window, broke a pane of glass and helped themselves to the goods. It appeared in evidence that the shutters were so insecure as to be easily opened from the outside-a state of things, the Police say, that is the case with all the half shutters in the city. This ought to be remedied, if storekeepers desire to preserve their property from the attacks of depredators,

FOR THE MAINLAND-The steamer Enterprise will sail for Burrard Inlet at 7 o'clock this morning. It is feared she will not be back in time to connect with the occar eteamer for San Francisco.

THE heroes of '76 rebelled against England, the "mother country," because they were taxed without being allowed representation in the English Parliament. For more than two years the people of ten States of the Federal Union have been heavily taxed to support the Federal Government, and yet have been denied representation in Con-

Talk of the "wrongs of down-trodden gress. Ireland!" The American Senators who recently expressed such sympathy with the executed Fenians, had better brush the dust from their Southern doorstep before they meddle with the affairs of a foreign country.

ARRIVAL OF THE FIDELITER .- The steamer Fideliter arrived from Portland yesterday at 11/6 o'clock, bringing a full freight and 13 passengers. She sailed from Portland on the 3rd inst. and crossed the Bar on Sunday morning. The Fideliter has received a new boiler since her last visit to this port. She will take the Alaska mail which came up on the California aboard, and will probably sail for New Archangel to-morrow morning.

INSURANCE AGENCY-R. H. Adams, of this city, has been appointed Colonial Agent for the Builders' (Fire and Marine) Insurance Company of San Francisco, and the Continental Life Insurance Company of New York. These companies rank high in the list of American assurers as substantial and responsible institutions, and the establishment of an agency here will doubtless prove profitable as well as beneficial.

THE CAPITAL QUESTION-We are credibly informed that a bearer of despatches on the Capital question arrived from the Colonial Office on the last mail steamer. The despatches instruct Governor Soymour to fix the Seat of Government at Victoria, and were sent forward by the Enterprise on Friday lest. The proclamation is expected down tomorrow.

THE COLD SNAP-At daylight yesterday morning the thermometer stood at 15 degrees above zero. Policemen and others who were out all Sunday night state that the weather was several degrees colder than on Saturday night. All the ponds are frozen over and

ALHAMBRA MUSICAL HALL-This beautiful hall will be opened as a Melodeon this evening, by Wm. Franklin, Ned Ward, George Pierce and Lafont, who have organised a Proupe and will give a select performance. The prices of admission are fixed at 50c. and 25c. WILLIS BOND, the colored orator, was ar-

rested on Sunday for going to Dunlop's stables and "kicking up a muss," On his way to the Barracks he resisted and struck the policeman. Yesterday he was profuse in his apologies, which the officer accepted and Willis was discharged,

THE WIRES worked well yesterday, but were occupied with private business until too late an hour for the transmission of a news despatch.

IKTAS -The Police, on Saturday, searched several native shanties and recovered a sufficient quantity of fancy goods and other iktas to stock a habordashery.

ANOTHER MAIL-The Fideliter brought an English mail which left San Francisco by the Portland steamer about a week before the California sailed for this port.

Among the passengers by the Fideliter yesterday was Mr Richard Stark, who returns with recuperated health, after an absence at the East of eighteen months.

THANKS .- We are under obligations to Capt Erskine for a fi e of Portland papers to POSTPONED .- Mr Marsh, in consequence of

the cold weather, has postponed the theatre for a few days. THE Columbia River was full of float-

ice at last advice. THE Salem (Oregon) Woolen Factory has been destroyed by fire. W dated be

Under such circumstonces probably an occasional letter from a friend will be welcome.

time has been singularly open and mild. the Bed Rock Drain after the whole summer

On Mosquito and Red Gulches everything looks lovely. Several claims are still being worked, notwithstanding the lateness of the season, and some of them yielding large returns. The Minnehaha washed up this week a trifle over two hundred ounces, and seems to be improving in richness every day. The Big Lead, Willow and Joint Companies, all on Mosquito Gulch, are paying largely. The Ophir, Discovery, Tip-and-Slasher and Catch-it-if-you-Can Companies, on Red Gulch, are also doing well. Several other Companies are taking out about wages, and others prospecting. Three or four other Gulches farther down Willow River, and emptying into it, are being well prospected th's winter, and I hope in my next to be able to announce good prospects obtained in at least two of them. The subject which most engages the attention of this little community at present is the proposal to organize a company for the purpose of prospecting Willow River; this river, as all your readers are aware who know anything of this district, runs through one of the richest sections of Cariboo; its bars and benches for many miles are known to have much fine gold, the gulches and streams emptying into it have been proved (some of them at least) to be exceedingly rich, and the most practical miners unhesitatingly give it as their opinion that if its bed-rock channel could ever be reached, a golden harvest, before which all other yields of Cariboo would appear insignificant, would inevitably be obtained. It is proposed to organize a company, with a capital of twenty-five thousand dollars, to be divided into one hundred shares, of two bundred and fifty dollars each. 'This amount, it is believed, will be quite sufficient to put down a large shaft to bed-rock, and drift until the channel is found. So sanguine are the people of this place that the thing can be accomplished that they have in this small community subscribed over six thousand dollars of the stock. I think the importance of this movement to the Colony can scarcely be over-estimated. Should it be a success and good prospects obtained, a section of mining country, nearly fifty miles in length. would be brought into notice, making room for and probably giving profitable employment to several thousand men. The gentleman who has been mainly instrumental in getting the project started will call upon you in Victoria and I respectfully ask for him your kind consideration and assistance. It is no Joint-Stock Bubble, but an honest effort to accomplish an important and useful work. 'Ere this reaches you, probably, Vic-toria will be enjoying her Christmas holidays, perhaps some of your readers while eating their Christmas dinner with pleasant friends will remember with a kindly thought us poor unfortunate Caribooites who on the same day will no dcubt be found toiling our way through sixteen feet (more or less) of snow to greet our fellow-unfortunates and bid them with a ghastly gun a Merry Christmas, and partake it may be of their holiday cheer of bacon and beans. However, the boys of Centreville expect to come to Victoria next fall with a pocket full of rocks (yellow ones) and in order to accomplish this we are prepared to submit to cold weather, coarse grub, rough society and any other inconvenience with the resolution of philosophers. One word more and I close this already too long epistle. When disappointed men tell you that Cariboo is a played-out or gone-in country, do not hesitate to give any such statement an unqualified denial; this country will continue to yield for years to come large quantities of gold to enrich the Colony of British Colum-

the result is that mining operations are yet being carried on quite successfully in many sections of the country. Water is quite plentiful, and the recent heavy falls of snow we have had will so protect the ground from frost that it is confidently hoped the supply will continue for some weeks yet. On William Creek an improved feeling has been created by the successful opening of and fall had been spent in efforts to accomwork profitably which have been idle for months, thus giving employment to many men who no doubt are sadly in need of

The crisis in American politics, if not past is at least delayed. The attempt to impeach the President by Congress will apparently result in failure-noses having been counted

and only filty-four members of the House being regarded as certain to vote for impeachment, and except a majority of that body are exasperated by some invasion of what they conceive to be their rights, the session is likely to come to an end with Mr Johnson still the occupant of the Presidential chair. The late elections were an awful rebuke to the Radicals. In every Northern State where the issue was raised, negro suffrage was voted down, and now the people of the North are asked if they would be justified in forcing upon the Southerners, at the point of the bayonet, a system which they themselves have rejected? The answer will be given next fall, whon a President and Mombers of Congress are to be chosen; and from present appearances the Radicals, but lately so powerful, will elect very few of their men. Colfax, Wade and Chase (noted Radicals) who were spoken of by their party as available eandidates for the Presidency, have been dropped with a suddenness which must have hurt their feelings; and General Grant, "the Washington Sphynx," as he is called, because he will not state his political views, is Insurance Company. now the favorite of the conservative wing of the Republicans, who believe POLICIES ISSUED on ALL CLASSES OF that his ideas are moderate, and that he possesses great administrative ability. The Democrats are pressing the claims of General Hancock upon publie notice. Hancock succeeded the tyrant Sheridan in command at New Orleans, and has set aside the obnexious measures of that commander and reinstated the civil officers who were turned out of office by Sheridan. Only a few papers bring forward Mr Johnson's name for the Presidency, yet no better man than Mr Johnson could be found for the position. During the rebellion he stood in the foremost ranks of the Union's defenders, and since the South was oushed he has borne patiently the greatest amount of vituperation, abuse and obloquy ever offered a public man, and has lived to humble his political adversaries to the dust and to see his policy triumphant. Mr Johnson saved the Democratic party, and in doing that saved the United States from falling into a state of anarchy and confusion similar to that which periodically con-Talses the Mexican Republic. He deserves well of his country. The execution of the Fenian convicts at Mans MUSICAL HALL. chester has created a hubbub in the States. Stress is laid upon the fact that two of the executed men, who, though born British subjects, were naturalized American citizens, were denied trial by a jury composed half of Americans and half of British subjects the judges deciding that the well-known axiom in Puglish law of "once a British subject a. ways a British subject," hold good, not withstanding their naturalization: The Fenian sympathizers in the United States contend that the rights of American naturalized citizens in England are the same as though they had

been natives of the United States.

An appeal is therefore made to the

American Government to protect its

naturalized citizens abroad, and to in-

sist that they shall be accorded the

same privileges that are extended to

other foreigners. The American Gov-

ernment, in answer to this demand,

has called the attention of the British

Government to the matter. Several

American papers in the Fenian interest

claim that there exists an analogy be-

tween the act of Great Britain in 1812, is boarding American ships and car-

rying off naturalized American citi-

zens to serve in her navy, and the re-

fusal of the English Judges to grant

a mixed jury for the trial of the

Fenians. But the argument is absurd

it was the American flag that was out-

In the case of the impressed seamen

same as if American territory had been invaded by an armed British force. But in the case of the Fenians, they selected their ground-they chose British soil on which to commit offences against British law. By that law they have been tried, found guilty and executed, for crimes which would have insured their hanging in their adopted country, and their memories deserve the execration instead of the sympathy of the great nation which they claimed as their own.

NEWFOUNDLAND SUING FOR ADMISSION meeting to discuss the subject of Confedera-tion was held in St John's Nov. 1st, at which, says a local paper, a good deal of in-formation was brought out, calculated to make men think.

The Public Ledger, in noticing the meeting, makes the following significant observa-

"The questions which seems to be press-"The questions which seems to be pressing upon every o.e but the most thoughtless, are the necessity of a change, and what this change is to be. Is the country to be reduced to a few mercantile men with such a number of fishermen as will suffice for their purposes, or is it to be raised from a mero fishing station to a higher level, and progress thus made possible? If things continue much longer in their present state, we shall soon reach the former condition, for the Anti-Confederates propses no scheme for the Confederates propose no scheme for the improvement of the country! And as the fisheries at present do not support the popufisheries at present do not support the population, that population must come down to a point at which they can support it. On the other hand, union ensures progress. We have proof of it in the case of the sister centry, whose progress is undeniable. The New Dominion must advance to a distinguished position in the world both of wealth and power, and Newfoundland, as a part of it, cannot fail to be carried forward in the FLOUR IMPORTED INTO NEW BRUNSWICK -

The following figures, compiled from reliable sources, make up a significant statement of the movements of the Flour Trade during the past three years.

We notice, however,

that a number of merchants are again advertising American brands, on hand and to arrive.—Halfax Chronicle.

The newspaper proprietors of St. John, N. B., have passed resolutions asking for the abolishment of newspaper postage through the Diminion. There has been no postal tax on newspapers in the Maritime Province for some years pa-t, and the people would not be estimited if they had again to come under the yoke. The tax should certainly be altogether abolished under the new regime.
The LOCAL MINISTERS.—Sir J A Macdon-

ald moved the following resolution:—Notice having been taken by a member of this House that the Hon John Sandfield Macdon-ald, a member of the Executive Council and Attorney-General of the Province of Octario, and the Hon Christopher Dunkin, a member of the Executive Council and Treasurer of the Province of Quebec, have been sitting and voting in this House during the present session, it be therefore resolved that it be re-ferred to the Standing Committee of privibelges and elections to enquire whether the said John Sandlield Macdonald and Chris-topher Dunkin have a legal right to sit and

topher Duckin have a legil right to stand vote in this House. Carried.

Notices of Motions.—Sir J A Macdonald, Michister of Justice, gave notice that on Tueaday he would move that the House do, on Thursday, resolve into Committee of the Whole to consider resolutions respecting the loan of three millions sterling for the Interceptial Reliews.

loan of three millions sterling for the Intercolonial Railway.

ANSWERS TO QUESTIONS.—Mr Metcalf (E
York) inquired whether the government
would provide for reducing the present post
age on letters.

Sip J.A. Macdonald replied that the measure when introduced would speak for itself.

In reply to Mr. Connell (Carleton, N. B.).
Sir Jo A. Macdonald said the government
intended, during the first part of the session,
to introduce a measure for the construction
of the Intercolonial Railway, and that they
designed to have further reports and surveys
made to assist in determining what route
should be adopted.

Hon Mr Anglin (Glucester, N. B.) in-

Bhould be adopted.

Hon Mr. Anglin (Gloucester, N. B) inquired whether, in filling vacancies in the
Senate from the Province of New Brun-wick, the Government intended to give due weight to the just and reasonable claims of the Catholics of New Brauswick to a representation in the Senate proportionate to their numbers.

Sir John A Macdonald replied that there

were two vacancies in the Senate from New were two vacancies in the Schute from New Brunswick, and it was the intention of Gov-ernment to fil these vacancies by the ap-pointment of fit and proper persons. Mr Mason (Soulanges, Q) icquired whether the Government intended to issue a new Commission of the Peace for the Dominion

of Canada, or whether the right of appointing

Commission of the Peace for the Dominion of Canada or whether the right of appointing Justices of the Peace is invested in local governments for their respective Provinces.

Sir John A Macdonald replied in the negative to the first part of the question. The second part of it, be said, belonged to a legal tribunal to determine.

HINTS TO HOUSEKEEPERS .- How to have not water always in the house. Let your wife find out that you visit another woman, and you will never afterwards be out of hot water. This is infailible.

How to bone turkeys. Get up at 2 o'clock a. m. The darker it is the better. Climb over your neighbor's fence and bone the first gobbler you can. You had better bone two or three while you are at it, as it saves trouble. You will find this plan very economi-
